

Nandan Hegde

Senior Full-Stack Engineer (LLM / AI Product)

Bangalore, India · Indian national · Open to relocation (Dubai / UK / US) & remote · 45-day notice · +91 86604 41202 · nandanhegde1096@gmail.com
linkedin.com/in/nandanhegde1096 · nandanhegde1.github.io/portfolio · github.com/nandanhegde1

SUMMARY

Senior software engineer (~6 years) who builds full-stack products and leads the AI workstream behind them. I own design, delivery, and architecture across Angular/TypeScript/Node front ends and the LLM services that power them, and coordinate a ~10-engineer team and the client. Strongest at turning ambiguous requirements into AI features that ship and hold up in production.

SKILLS

Frontend: Angular, TypeScript, RxJS, JavaScript, React, HTML/CSS, SCSS, Tailwind

Backend & Data: C# / .NET (6/8), Azure Functions, Node.js, Express, Python (scripting & prototyping), REST APIs, SQL (PostgreSQL / Supabase), MongoDB, Power BI

AI / LLM: LLM integration (Claude, Gemini, Azure OpenAI), AI agents — voice-agent orchestration (Bland AI), AI voice-interview + fit-scoring, RAG (retrieval + ranking, query routing), evaluation (recall@k, CI eval gates), prompt engineering, multi-language

Cloud & DevOps: AWS, Azure DevOps, CI/CD, Karma/Jasmine, Git

Leadership: solution architecture, team coordination, Agile/Kanban, code & design review, mentoring

EXPERIENCE

thinkbridge — Senior Software Engineer

Mar 2022 – Present · Bangalore

Client: PSG Global Solutions — lead the AI workstream on a recruiting platform used by 10,000+ people (full-stack, from the Angular product layer to the AI services behind it).

- Lead design & delivery of the platform's AI features end to end; coordinate a ~10-engineer team and work directly with the client.
- Flagship: designed an AI voice-interview + fit-scoring system — an AI voice agent interviews each candidate and the transcript is scored into a fit score against the role across skills, experience, location, availability, and tenure, weighting the interview over the résumé.
- Architecting a candidate-ranking engine on top of it (retrieval + ranking, in progress): owning the ranking model, evaluating vector-database options for a later phase, and designing a model-cost strategy for production scale.
- Built a secondary LLM voice agent (Bland AI) that calls candidates in multiple languages — designed the conversation pathways and scheduling, replacing manual follow-up for documents, bookings, and reminders.
- Led the Compass modernization: migrated legacy AngularJS to modern Angular (now 19), ~30% faster loads for 10,000+ monthly users; integrated Power BI, Microsoft SSO, and Bland AI; delivered 15+ features across 5 sprints.
- Drove testing to high branch coverage on critical modules (measured in the Azure DevOps CI pipeline); built the CI/CD pipelines; set the team's "passing-tests screenshot, or no merge" PR rule.
- Drove adoption of Claude across 30+ engineers and authored the team's AI-usage guidelines.
- Built a browser extension automating recruiting data capture for 500+ users, and a real-time candidate-data sync engine in Angular.

Infosys — System Engineer → Senior System Engineer

Jan 2020 – Mar 2022 · Bangalore

- Modernized the UI for Swiss Re's global insurance-claims tool used across 40+ countries (Angular; lazy loading, code splitting, AOT).
- Built UI + Node.js for an internal cloud-migration accelerator generating boilerplate and infra across Azure, AWS, and GCP via Terraform; set up CI/CD.
- Infosys Foundation Program — High Performer (82%), MEAN-stack specialization.

PROJECTS & CERTIFICATIONS

AWS Certified Solutions Architect – Associate (2021)

Side projects (live): Ask GovAI — a measured RAG over 670+ U.S. federal AI/ML contract awards (BM25 retrieval → grounded, cited LLM synthesis with a refuse-to-invent guardrail and a reproducible eval, recall@8 = 92% (69% BM25 baseline + structured query routing)); mcp-directory — a searchable directory of public MCP servers. github.com/nandanhegde1

EDUCATION

B.E., Electronics & Telecommunication — Dayananda Sagar College of Engineering, 2019
